Madrona Dry Gin

"America's Best Negroni"

-The American Distilling Institute

Madrona Dry Gin is a bright and flavorful gin designed with the perfectly dry Martini in mind. Juniper-forward with citrus elements contributed by coriander seed and the peel of lemons and oranges.

We make this gin in our 200-liter still in Redmond Washington using a two day process of steeping the botanicals in a pure spirit distilled from wheat, followed by slow distillation. The collected distillate is carefully blended with filtered Cascade mountain water to create this award-winning spirit!

Our botanical recipe is the product of years of research and testing in collaboration with gin experts in the USA, Scotland, and England. The result is a gin well-suited to enjoying straight up in a martini or in your favorite cocktail.

Distilled and bottled by Madrona Distilling Inc on Orcas Island, WA
